

CLoud TRANSFORMATION AND ORCHESTRATION

● CLOUD STRATEGY

- Cloud as the means to an 'end' but not the 'end' itself
- Cloud roadmap
- Alignment with business goals
- Cloud use cases
- IT environment alignment to cloud offerings
- IT business model impacts
- Cloud benefits tailored to the organisation

● READINESS / ENABLEMENT / SERVICE INTEGRATION

- Organisational readiness to enable benefits for cloud
- Building blocks to enable effective use of cloud
- Service integrator, service provider relationship
- Service design
- Service and cloud billing
- Identity in the cloud
- Automation needs and gaps

● GOVERNANCE FRAMEWORK / RISK ASSESSMENT

- Automation of governance
- Understanding risk profile
- Risk scoring
- Regulatory interest and applicability
- Business risk based acceptance/rejection - alternate sourcing

● BUSINESS CASE / TCO

- Business case build
- TCO comparison between providers and internal use
- Recovery model for internal use
- Cloud usage scenarios

● TRANSFORMATION / MIGRATION

- Application development changes
- Operations architecture changes
- Organisational changes
- Application and service candidacy for cloud
- Cloud service catalogue
- Process change
- Maximise the return from investment in cloud
- Execution of migration to cloud

● SELECTION / SOURCING

- Provider comparison, evaluation and selection for your business needs
- Right sourcing
- KPI creation for cloud sourcing
- Avoiding bill shock
