

Diaxon DevOps kickstart package

**WANT MORE OF A DEVOPS CULTURE WITHIN YOUR TEAM?
HOW DO YOU GET THE BAU AND DEVOPS CULTURE BALANCE?
HOW DO YOU INITIATE AND PROGRESS YOUR DEVOPS JOURNEY?**

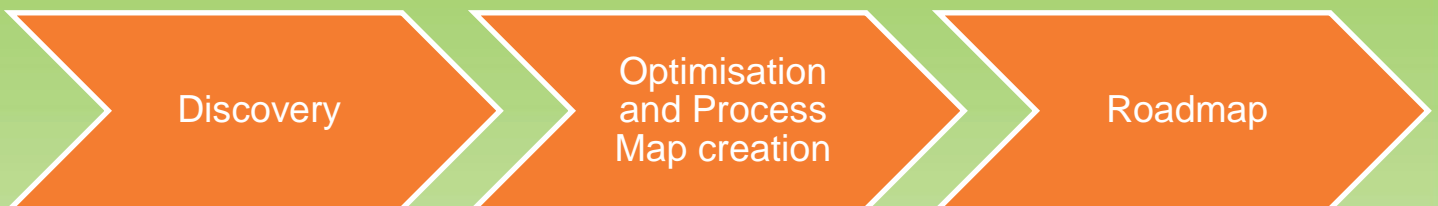

OVERVIEW

Diaxon will undertake a top down business benefit focused assessment of DevOps enablement with you and your team to assist you in pragmatically heading on the DevOps journey. A journey that is focused on realising tangible business benefits that can be measured within the financial year.

Diaxon will workshop with key stakeholders to identify the business outcomes and corresponding business benefits that DevOps can achieve. User stories will be created that represent the business outcome which will then have business process maps created for their current state. We will work with your teams to perform an optimisation across the process maps looking at ways that DevOps can transform the user story to realise the business targeted benefits.

Diaxon can get your company ready, aligned to and realising in year tangible business benefits and on the DevOps journey

SERVICE OVERVIEW

- Diaxon will conduct a series of workshops with key stakeholders to outline the business benefits, define the outcomes, and work through what will be needed to encourage people to align to the journey.
- User stories aligned to the identified business outcomes will be defined which can enable the in year business benefits realisation.
- The user stories current state will be process mapped

- Diaxon will work with you to undertake an optimisation exercise across the process maps; considering all aspects of people, process and technology to "enable but govern" the outcomes
- From the optimised maps a list of integration points and new standards, automation architecture requirements will be identified

- Considering all aspects of the DevOps journey - People, Process, Technology
- Document DevOps enablement reorienting incremental tangible business benefits to your organisation whilst paying consideration to the pragmatic rate of change your business demands.
