

Cloud Finance Visibility and Optimisation

Accelerate your cloud financial management capabilities

Common Challenges

- No unified approach between cloud stakeholders (technology, finance and business teams) to understand and manage cloud spend
- Operational and financial disconnects caused by the decentralised nature of cloud spending
- Keeping up with the true costs of cloud resources, creating difficulties to plan future cloud spend
- No show-back or chargeback mechanisms to drive accountability
- Balancing operational and financial control with the demands of fast-paced, agile environments
- Cloud sprawl inefficiencies impacting business velocity
- Numerous cloud provider options and heterogeneous IT environments create new challenges to monitor consumption and enforce policies
- Lack understanding of cloud TCO and exceeding cloud budgets

Our Solution

Cloud Finance Visibility

- Provide guidance for improved cloud financial data visibility based on business needs, segmentation and data requirements
- Evaluate cloud account hierarchy and develop tagging strategy aligned to business segmentation
- Provide governance strategies and guidance for alignment of resources and platform configuration
- Develop reports and dashboards to understand cloud usage as input to develop an optimisation plan

Cloud Finance Optimisation

- Develop a strategy to optimise cloud resource usage, consumption and rates that is aligned to cloud finance principles and the business financial plan
- Establish KPIs and benchmarks with targeted user groups and implement a process to track results
- Evaluate cloud automation methods and tools to achieve and maintain defined performance levels
- Identify workflows and processes, and develop an action plan for ongoing optimisation activities
